

Dear United Nations High Commissioner for Human Rights,

We have a grave situation here in the USA, which is in desperate need of public exposure and help for victims of remote technological targeting and psychological torture, which is being done through covert operations that are recruiting citizens into literal enslavement. Through the past few decades this appears to have grown to a critical level. Some citizens appear to be deceitfully recruited into the program under the guise of it being a good thing. And others have been forced into it - tortured into a "rescue" that is performed by those who target and enslave them.

It is my understanding that, in the entry level of the enslavement program, victims are forced to change their names, have reconstructive surgeries, are brainwashed into secrecy and ordered to obey the commands of their leaders. Some victims are listed as missing and others are thought to be dead, but are alive and enslaved. Others appear to be lifted from their lives for about two weeks and then replanted after being brainwashed...etc.

Those of us who refuse to join, (especially those who have witnessed too much) are being literally tortured around repeated demands for us to go "home" - to allow ourselves to be shoved into the covert enslavement program.

I have been begging for various levels of government help since 2006. My associations with the FBI have shown me that they are fully aware of these crimes and appear to be unable or unwilling to openly acknowledge them or do anything to help us. A few agents have tried to covertly help me, but that "help" has followed perpetration aims to pull me into the enslavement program...etc. They have not been able to help me in the ways that I need it. It appears that some FBI families are also being targeted and there is a problem with criminal infiltration within the agencies. (My uncle worked for the FBI)

I had an experience with a man in a USA Home Land Security office who proved to be one of (if not just used by) those who are torturing us and forcing us into enslavement.

The FBI and other law enforcement agencies, know (since at least 2012) that I have been being targeted. There appears to be a huge aim, in all law enforcement agencies, to hide the crimes and keep victims and witnesses from speaking out.

The core of the targeting appears to be done by some sort of satanic occult that is extremely technologically advanced and appears to have infiltrated our government as well as our civilian societies. **I fear that the future wellbeing of all of humanity is in serious danger if this is allowed to continue and grow.**

Those who target me have repeatedly threatened to harm my family members. There have been many suspicious deaths surrounding my daughters and I. Among them is that of my little brother (Kevin LaBree) who died in a mysterious "accident" a few months after he started figuring out that we were being targeted. Victims have been being told that if we seek help or report the crimes we will be killed, crippled, tortured more heavily, institutionalized and force medicated with a false "mental illness" diagnosis or jailed through being framed for a crime.

I can not list names of other victims here, because I am sure this letter will not remain private. But I personally know dozens of victims. Some are too scared to even try to seek help and its all they can do to just survive round after round of covert targeting. Some have been inflicted with brain damage. Some are missing. Some are dying. Most of them are not even aware of what is happening to them. The fear in the eyes of those who are aware of being targeted haunts me every day. I know that type of fear and helplessness too well. But I have been being targeted for so long that my fear is being replaced with an indescribable pain and anger at the horrible injustices and grossly inhumane practices that freely continue and grow with no safe place for victims to turn to for validation, advise or help. This situation is truly holocaustal and we are in desperate need of brave groups of governmental angels to stand up for and help us.

The last time there was a direct attempt on my life was a few days ago through what appeared to be some sort of substance that was put in a drink and caused a mild heart attack. (Thank God I did not drink much of it.) But the worst of the targeting is the ongoing surveillance and psychological and technological torture, which is done through the slaves in organized stalking programs, with laser weapons, various types of microwave weapons and psychotronic mind control technologies. **The mind control part is the most difficult to believe but is the key to the success of the enslavement process and is in desperate need of realization.**

Most people are aware that radio waves can be sent down to their homes or computers, from satellites, for the purpose of internet access. But most are not aware that these radio waves (microwaves) can also be criminally used. Condensed beams of radio waves, shot into the human brain, can effect functionality in ways that range from mental numbness and confusion. . .to brainwashings and brain damage. Remotely inflicted mind control is VERY effective on victims who are on antidepressants, which are being heavily pushed as well as being found in public drinking water throughout the USA.

The episodes of technological torture, which I experience, range from being painful to terrorizing and usually come with threats to remain silent about what is happening to me and what I know. Through almost every day I experience psychotronic and microwave weapon attacks to various parts of my body. My homes have been destroyed and I am not being allowed to do my work, which has been continuously sabotaged through things like torturing me, changing my phone numbers, and targeting my sponsors as well as those who try to help me. My writings, web sites, computers, emails, phone and mail have been interfered with. (I pray that you get this letter the way I wrote it.) Every day of my life has become a fight to survive on psychological and physical levels. **I am in desperate need of protection from further targeting, as are many others.** Our suffering is immense and I beg you, from the bottom of my heart, to please help us. Please do not allow these crimes to continue and grow.

With hope for all of us

P.S. I was previously known as Sharon LaBree, Sharon Buck. Namatari Neachi was my pen name. I was born in the USA in 1959 and have resided here for over 55 years.

I have not engaged in criminal activity and was a mother and business owner who had perfect credit and owned a nice country home before the targeting vamped into levels that began destroying my life. I have experienced rounds of covert targeting, which have gradually increased in intensity, since the 1970s. This was so inconspicuous that I did not realize I was being targeted until it vamped into obvious levels in 2005. Prior to that I just thought I was having a lot of bad luck. Since then I have been experiencing an indescribable hell. And I am in desperate need of regaining my Freedom.

Note to readers: If you or anyone you know is in a secret society / covert organization please pass this on to them. Please also share it with anyone else you know, in order to prevent them from joining. Please do all that you can to help regain the Freedom humanity needs, in order for human beings to grow and evolve into all that we were meant to be. Thank You.
